Active ingredients

The product is a dietary supplement based on Maltodextrin, Taurine, Reduced Glutathione, Caffeine and with Ginseng, Vitamin B6, which contributes to normal energy metabolism and the reduction of tiredness and fatigue Red Ginseng is not only an antioxidant, but also a tonic for physical and mental fatigue and aids carbohydrate metabolism. Creatine increases physical performance during repetitive, high intensity and short duration activities

Booster Plus® with its targeted formulation allows the athlete to have the concentration and energy needed to perform the task at hand. It improves performance by enhancing muscular activity and simultaneously reducing fatigue.

What's in it

Maltodextrin; L-citrulline DL-malate; L-arginine alpha-ketoglutarate; Creatine monohydrate; Beta-alanine; Acidifier: tartaric acid, citric acid; Orange flavour; Taurine; Acidity corrector: sodium hydrogen carbonate; Ginseng (Panax ginseng C. A. Mey.) root ES tit. 5% ginsenosides; Anti-caking agent: Silicon dioxide; Reduced L-glutathione; Caffeine anhydrous; Sweetener: Sucralose; Vitamin B6 (Pyridoxine hydrochloride); Colouring: Beta-carotene
